

EUROPEAN ELECTION CAMPAIGNS: STATEMENT BY WILFRED MARTENS, EPP PRESIDENT

5/4/2009

Europe is facing a major challenges concerning the present transitions in world economy. The European People's Party believes that together we shall find an answer to the world-wide crisis, which is fundamentally affecting the everyday life of the people. In order to be able to act efficiently in the interest of our citizens, we need a strong Europe based on values.

The European People's Party welcomes that its member parties transboundary support each other in their campaigns for the European Parliament elections, or hold common campaign events and encourage people to participate in the elections – like the Party of the Hungarian Coalition from Slovakia and Fidesz-Hungarian Civic Union from Hungary.

The European People's Party at the same time finds it worrying and insupportable that certain parties and governments are instigating hatred and voicing false and unjust accusations against parties and politicians, who are cooperating along the common European system of values.
